

Our Services

Our Services

Cardio Respiratory Care

The Cardio Respiratory Department is instrumental in assisting with the diagnosis and management of cardiopulmonary disorders. [Click here to continue reading about Cardio Respiratory Care...](#)

Chemotherapy

Woodstock Hospital works with the London Regional Cancer Centre to provide systemic chemotherapy services closer to home for referred patients from Oxford County. [Click here to continue reading about the Chemotherapy/Infusion Clinic...](#)

Diabetes Education Program

The Diabetes Education Program provides education and support to individuals newly diagnosed or with established diabetes and to their families. [Click here to continue reading about the Diabetes Education Program...](#)

Dialysis

Routine hemodialysis is conducted in the Woodstock Hospital Dialysis Unit, where treatment is initiated and managed by specialized nurses and technicians. [Click here to continue reading about the Dialysis Unit...](#)

Emergency Department

Woodstock Hospital offers Emergency services 24 hours a day, 7 days a week. On average we care for over 46,000 people every year. [Click here to continue reading about the Emergency Department...](#)

Laboratory services

Registered Laboratory Technologists perform the monitoring of drug levels, cholesterol testing, urinalysis, nutritional status, cancer identification, among other diagnostic tests. [Click here to continue reading about lab services...](#)

Outpatient Nutrition Services

A registered dietitian will assist the client on a variety of nutrition topics from healthy nutrition approaches to mindful eating, while providing specific nutrition advice related to certain medical conditions. [Click here to continue reading about Outpatient Nutrition Services...](#)

Occupational Therapy

The Outpatient Hand Therapy Program at Woodstock Hospital provides specialized services to patients of all ages with hand and upper extremity injuries and disorders. [Click here to continue reading about the Outpatient Hand Therapy Program...](#)

Physiotherapy

Physiotherapists assess, treat and prevent many physical problems caused by illness, disease, injury, ageing and long periods of inactivity. Physiotherapists are skilled. [Click here to read more about Physiotherapy at Woodstock Hospital...](#)

Speech-Language Pathology

The Speech-Language Pathology Department provides assessment and treatment for adults with speech, language, stuttering, voice, feeding or swallowing problems. [Click here to continue reading about Speech-Language Pathology....](#)

Woodstock Rehabilitation Clinic

The Woodstock Rehabilitation Clinic is a fee for service clinic operated by Woodstock Hospital. The professional services offered include ergonomics, concussion management and sports medicine. [Click here to continue reading about the Woodstock Rehabilitation Clinic.](#)

Maternal Child Services

The Maternal Child Unit welcomes over 900 new babies into the world each year. We provide individualized antepartum, intrapartum and postpartum care within a family-centred framework. [Click here to continue reading about Maternal Child Services....](#)

Mental Health

As a Schedule 1 Psychiatric Facility with 16 adult acute care beds, Woodstock Hospital offers a wide range of inpatient and outpatient services to residents of Oxford County. [Click here to continue reading about Mental Health Services....](#)

Recreation Therapy

Recreation Therapy is all about making time fulfilling instead of just filling time. Recreation Therapy is designed to assist individuals in achieving a satisfying leisure lifestyle. [Click here to continue reading about Recreation Therapy....](#)

Surgical Services

Woodstock Hospital's Surgical Services Department is comprised of a highly skilled team of nurses, physicians and support staff who provide progressive surgical techniques with modern equipment. [Click here to continue reading about Surgical Services....](#)

X-rays

X-ray exams are the most common studies performed in Radiology or Diagnostic Imaging. These exams include routine x-rays of bones, joints, chest, abdomen and spines. [Click here to continue reading about x-rays....](#)

Magnetic Resonance Imaging

MRI stands for Magnetic Resonance Imaging. MRI uses magnetism and radio waves to produce highly detailed images of structures within the body. [Click here to continue reading about Magnetic Resonance Imaging....](#)

CT Scan

CT stands for "computed tomography". CT scans provide highly detailed images of every region of the body and are most commonly used to examine the brain, chest, abdomen/pelvis and back. [Click here to continue reading about CT scans....](#)

Ultrasound

Ultrasound images are produced by sound waves. A scanning probe is passed over the area of the body that is being examined. [Click here to continue reading about ultrasounds at Woodstock Hospital...](#)
